Subject: New Forest Fire East of Forest Lakes - WILDCAT Fire

To all Forest Lakes Residents and Friends,

A new fire, called the Wildcat Fire, broke out late this morning (6-14) about 4 miles East of Forest Lakes off the Forest Service 122/178 Roads. It is at approximately 4 acres. Please be assured that it is **NO THREAT TO FOREST LAKES**. There might be smoke visible in the East, but the normal Northeasterly winds should keep it away from us. Updates will be sent as necessary. No news will be good news.

Here is a picture, courtesy of FLFD ODS.

Since I'm sending out a Forest Fire Report, here is a [Final Report on the Slim Fire:](#)

Pending any changes, this will be the last report I'll send out on the Slim Fire. As of June 10, the fire is 75% contained. Anticipated incident containment or completing date is June 20th. We are indebted to all the firefighters and the Incident Command Teams that have worked tirelessly since the beginning of the fire on June 1st to get containment and control and keep it from getting any closer to Forest Lakes.
