

BEAR SMART.... FROM THE START

Drought, Wildfire and Development cause bears to roam and look for alternative food sources. Last year in Forest Lakes, we had a bear problem most of the summer. Let's each one do our part to keep that from happening again this year.

What is our part?.....

- Recognize that garbage is their number one food source ... store yours inside or haul it home with you when you leave Forest Lakes.
- Remove bird feeders at night, when you are not enjoying watching them. Bears love sweet hummingbird nectar.
- Burn off your grills. That yummy steak smell is almost irresistible!
- Keep pet food inside and inaccessible to wild animals.

Keep in mind, that when we create a problem bear by our actions, we are usually creating a DEAD BEAR.

**AS A COMMUNITY, LET'S ALL BE BEAR SMART.....
.....FROM THE START!**
